1.28 conormal bundle

1. conceptions describing the singularity

tangent cone $\subseteq \bigcup$ limit of tangent spaces \subseteq tangent space
in Grassmannian, for affine variety

e.g

$$\begin{aligned} \{w^2 = z^3\} \quad \{w^2 = 0\} &= \{v \in \mathbb{C}^2 \mid \langle v, dw \rangle = 0\} \subseteq \mathbb{C}^2 \\ \{z_1^2 + z_2^3 + z_3^4 = 0\} \quad \{z_1^2 = 0\} &= \left\{ v \in \mathbb{C}^3 \mid \langle v, a dz_1 + b dz_2 \rangle = 0 \right. \\ &\quad \left. \text{for some } (a,b) \in \mathbb{C}^2 - 0 \right\} \subseteq \mathbb{C}^3 \end{aligned}$$

Apart from these conceptions, we have topological cone:

$$\{w^2 = z^3\}$$

with link $S' \subseteq S^3$

$$\{z_1^2 + z_2^3 + z_3^4 = 0\}$$

with link $S^3 / \mathbb{Z}_3 \mathbb{Z} \subseteq S^5$
