## Eine Woche, ein Beispiel 49 group cohomology

Etingof-Gelaki-Nikshych-Ostrik: Tensor Categories

$$H^{\circ}(G,A) = A^{G}$$

$$H'(G,A) = \begin{cases} f: G \longrightarrow A \times G \\ A \times G \end{cases} / A - conj$$

$$= H^{\circ}(G,A) = \begin{cases} f: G \longrightarrow A \times G \\ A \times G \end{cases} / A - conj$$

$$H^{\circ}(G,A) = \begin{cases} f: G \longrightarrow A \times G \\ A \times G \end{cases} / A - conj$$

$$G \xrightarrow{GA \times G} \begin{cases} f: G \longrightarrow A \times G \\ A \times G \end{cases} / A \rightarrow 0 | X \text{ abelian } \end{cases}$$

$$= \begin{cases} f: G \longrightarrow A \times G \\ A \times G \times G \end{cases} / A \rightarrow 0 | X \text{ central ext of } G \end{cases}$$
